NEW ZEALAND

RECYCLE IT. UPGRADE IT. **SUSTAIN IT.**

Trade in your dental equipment and give it a **second life.**

NSK

As dental professionals and industry partners, we dedicate ourselves to improving lives every day. That same commitment extends beyond the treatment room through the choices we make for our practices, our communities, and our environment. Together, we all have a role to play in reducing waste, conserving resources, and embracing smarter, more sustainable ways of working.

At NSK, sustainability is not just a corporate responsibility. It is a commitment to the generations that follow us. Every piece of equipment that is repurposed or responsibly recycled helps reduce landfill waste, conserve valuable materials, and minimise environmental impact. That is why I am excited to launch our **Recycle It. Upgrade It. Sustain It.** initiative.

More than a trade-in program, it is an opportunity to rethink how we manage dental equipment at the end of its lifecycle. By giving retired equipment a second life, we can reduce unnecessary waste while enabling clinics and practices to access the latest NSK technology through a more responsible approach to resource management and recycling.

During my recent visit to Fiji, I had the privilege of seeing firsthand how dental professionals are making a difference in their communities despite limited resources. It was inspiring to witness NSK equipment supporting local clinics, university training programs, and mobile dental services that bring essential oral healthcare to underserved communities. These experiences reinforced that our equipment is more than technology, it plays a role in educating future clinicians, supporting dedicated practitioners, and expanding access to quality care. It was a powerful reminder of the positive impact our industry can create when innovation is combined with purpose.

Sustainability is not achieved through one large action. It is built through many small, conscious decisions that collectively create meaningful and lasting impact. Through initiatives like this, we are not only investing in better technology but also helping build a more sustainable future for our industry.

Thank you for being part of this journey!

Phil Fitzgibbon, Managing Director of NSK Oceania

UPGRADE TO QUALITY. UPGRADE TO NSK.

HOW IT WORKS

Recycle & Upgrade any handpiece for a handpiece, unit for unit, or motor for motor.

Choose the **new NSK product** you want
